Question 1

You are working with a new developer who needs to be able to deploy code and view logs on Magento Commerce Cloud.
What must you do to give them access?

Options:

A. In the .magento.app.yaml file, add their email under Users. They need to enter their SSH public key.

B. Add their SSH public key to a file named .ssh/authorized_keys and deploy the change.

C. In the Cloud Project Web UI, click Add User to add their email. They need to enter their SSH public key.

D. Add a Magento admin user for them and paste the SSH public key into their user's SSH Key field, which
is available only on Magento Commerce Cloud.

Answer: B

Explanation:
Reference: https://devdocs.magento.com/cloud/before/before-workspace-ssh.html

Question 2

You have a Starter project. Your code is ready for testing in the Staging environment, but you need the latest data from Production.
What do you do to update the Staging environment?

Options:

A. Log in to the Project Web UI, choose the Staging environment, and click Sync

B. Log in to the Project Web UI, choose the Staging environment, and click Merge

C. Checkout the Staging branch and use the git push origin -f command

D. Checkout the Production environment and use the magento-cloud sync CLI command

Answer: B

Explanation:
Reference: https://devdocs.magento.com/cloud/live/stage-prod-migrate-prereq.html

Question 3

You need to specify the admin password using an environment variable. You have created an environment variable env:ADMIN_PASSWORD with a valid password. When attempting to log in to the Magento Admin it
is not accepting the new password.
How do you correct the environment variable?

Options:

A. The Sensitive option is checked by default and must be disabled

B. The env:ADMIN_PASSWORD variable can only be used for an initial installation

C. The environment variable should not have the env: prefix

D. The ADMIN_PASSWORD variable should be configured via .magento.env.yaml

Answer: C

Explanation:
Reference: https://devdocs.magento.com/cloud/env/environment-vars_magento.html

Question 4

While investigating an inherited Magento Commerce Cloud project, you notice the following SCD_MATRIX

configuration in .magento.env.yaml:
stage:
global:
SCD_MATRIX:
"magento/backend":
language:
- en_US
What is the effect of this configuration?
